WHAT WE DO

We deliver and support control system solutions within the oil & gas industry, renewable energy and other onshore industries. VCS has developed a new control system platform design, that provides the customers with modern state of the art control system solution, based on the latest technology and enhanced functionality. Our specialty is to turn old and obsolete control systems into new, modern and effective control solutions by using state of the art technology.

ABOUT US

Vision Control Solutions (VCS) was established December 2018 by specialists in Aero-derivative Gas Turbine Control Systems, all with 10+ years' experience.
