In critical industrial systems, every connection counts

At Vicosol, we combine deep-domain expertise with high-performance solutions built for the oil, gas and power sectors. Our valve-and-transducer connector systems, built with premium-grade Amphenol StarLine EX technology, bring together precision engineering and true plug-and-play simplicity.

Imagine replacing a valve in minutes — no rewiring, no errors, reduced downtime. Every assembly is pre-tested and verified, so installation is not just fast but fail-safe. The result: immediate performance, sustained reliability and the kind of uptime your operations demand.

Vicosol: Where smarter connections deliver safer, faster, and more efficient control systems.

Smart Valve & Transducer Integration

Designed with Amphenol Starline EX connectors for maximum durability and safety

Plug-and-play solution for valves and transducers — no rewiring required

Enables rapid valve replacement and minimizes downtime

Each assembly is pre-tested and pre-verified for flawless operation

Eliminates wiring errors — connected right once, every time

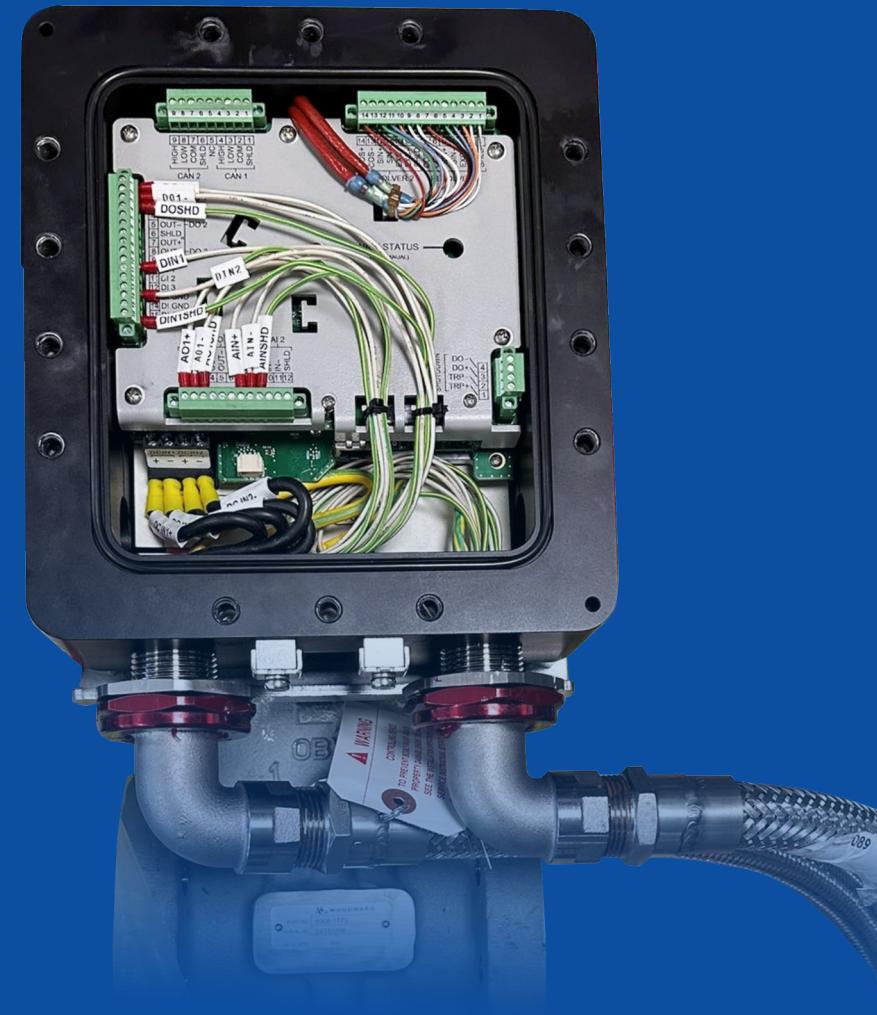

Ideal for harsh environments requiring quick and secure maintenance

Fast • Reliable
• Error-Free
Connections

Plug in
and perform

Connectivity
made simple

Woodward – GS40/50 Valve with connector solution

Woodward GS40/50 Gas Metering Valve with:

1 x Power

1 x Signal connections

Amphenol StarLine Ex connectors

Select between Pre-assembled cables /conduits with matching connectors

[Get a quote](#)

GSOV50 Gas Shutoff Valve with connector solution

Woodward pressure transducer box with:

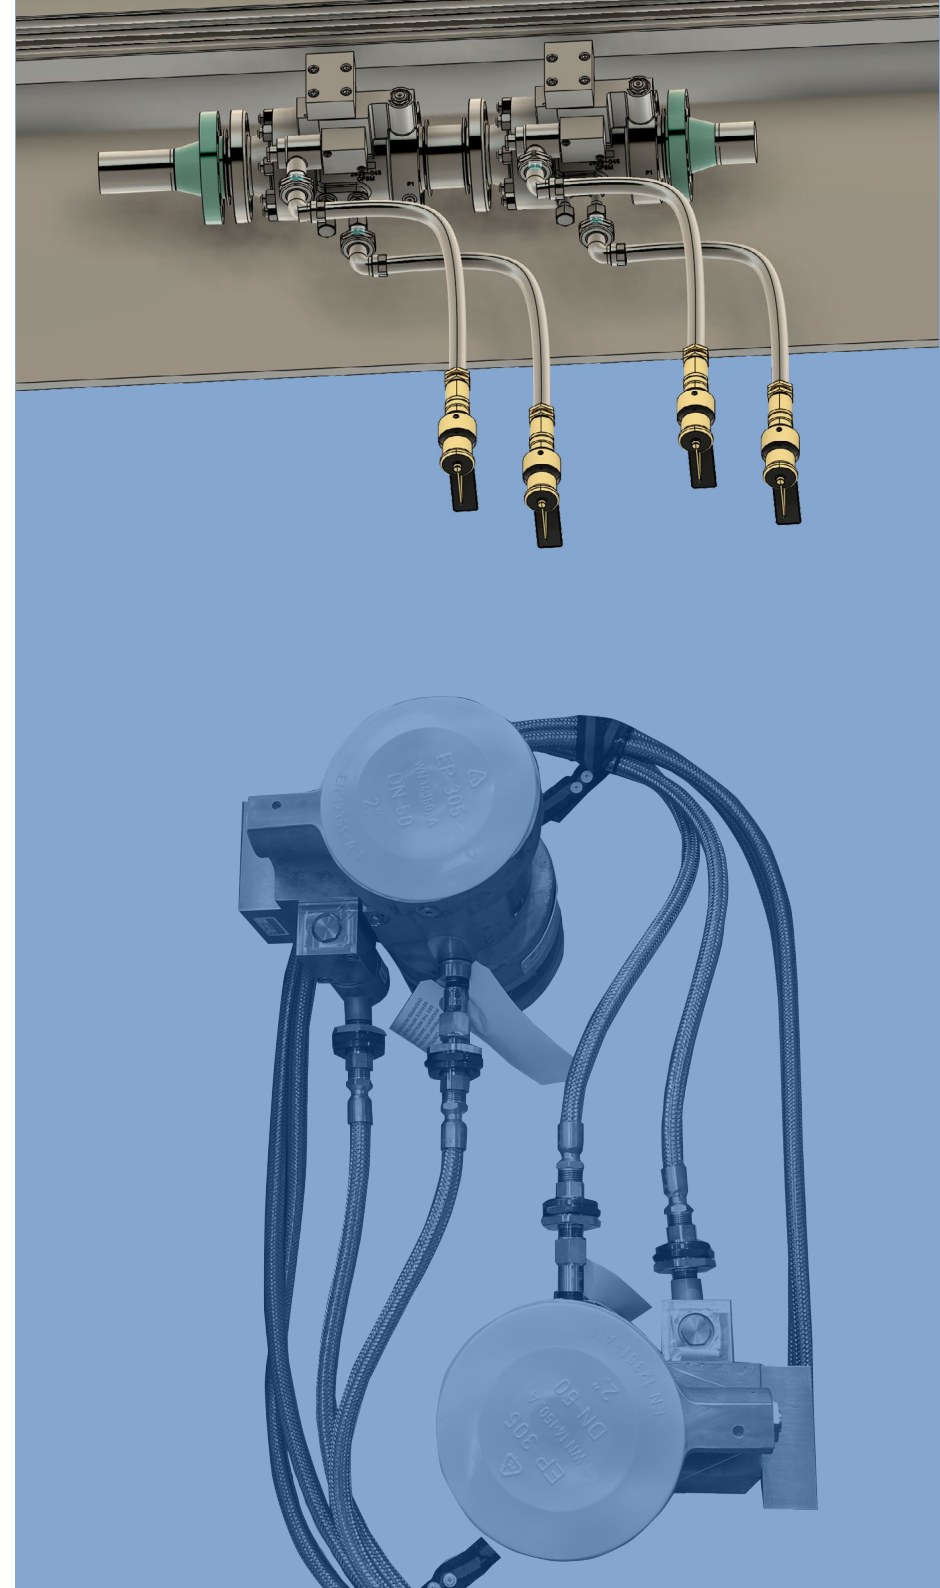

1 x Solenoid power connector

1 x Position feedback connector

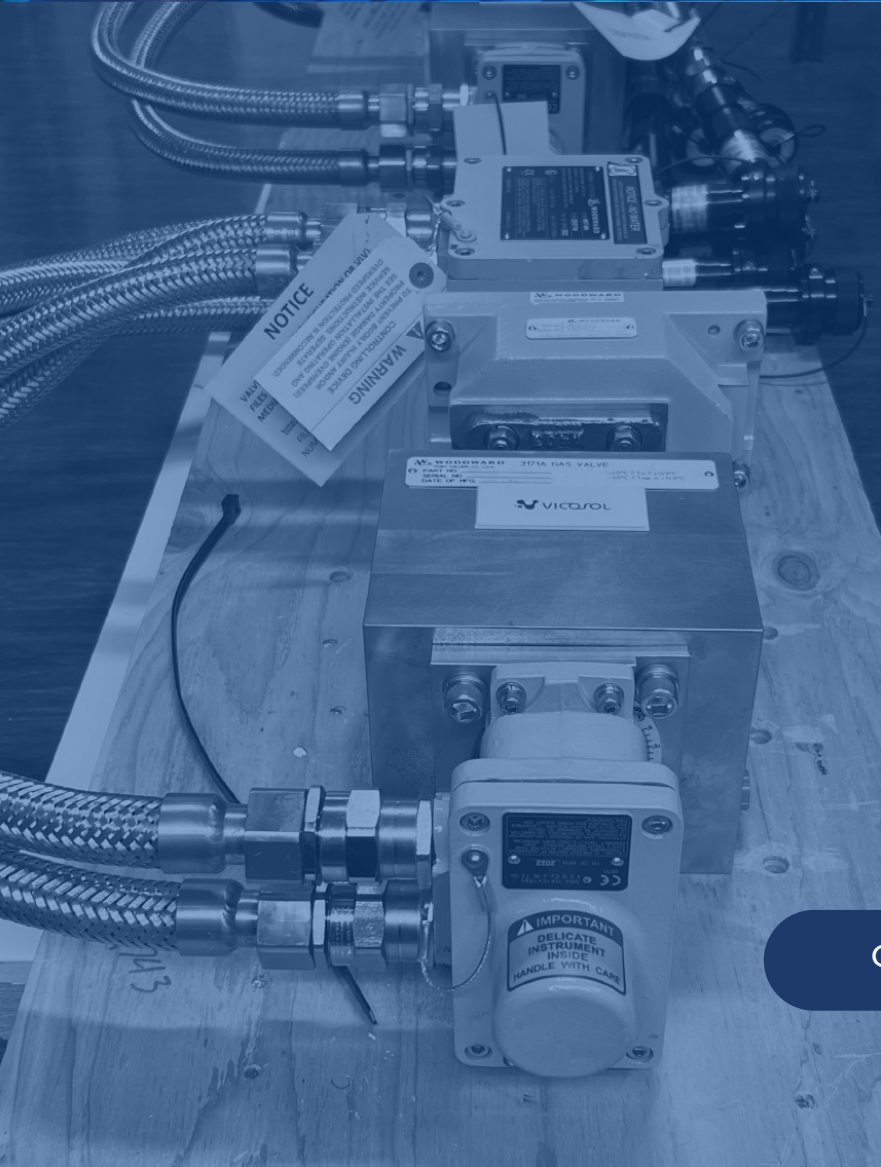

Amphenol StarLine Ex connectors

Select between mating cables or conduits with corresponding connectors

Get a quote

Woodward – 3171 Valve with connector solution

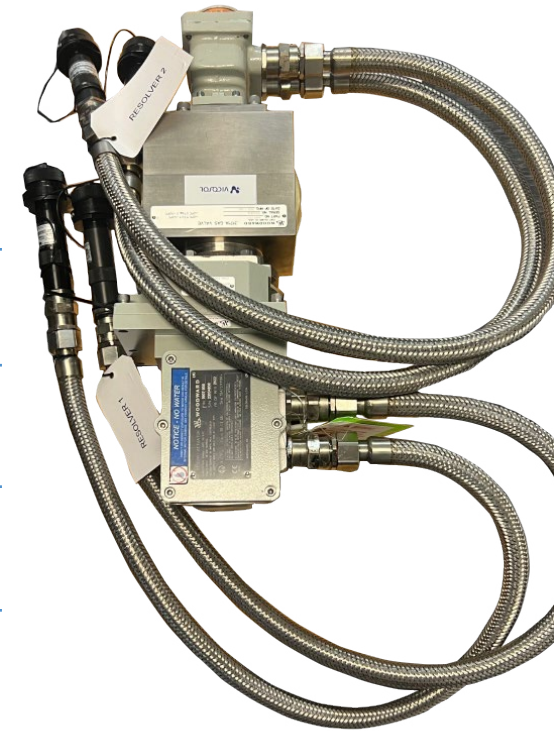

Woodward 3171 Gas Metering Valve with:

1 x Power

3 x Resolver connections

Amphenol StarLine Ex connectors

Select between Pre-assembled cables /
conduits with matching connectors
